

The HWX4 series of Gefran are pressure transmitters with HART communication protocol for using in high temperature environment with explosive atmosphere presence.

The main characteristic of this series is the capability to read temperature of the media up to 315°C.

The constructive principle is based on the hydraulic transmission of the pressure.

The fluid-filled system assures the temperature stability. The physical measure is transformed in a electrical measure by means of thick film strain-gauge technology.

The **SIL2** and **PL d** approvals make the product suitable for use in the **Functional Safety** applications, particularly in the process plants for the production of polymers, where it is an essential requirement.

## MAIN FEATURES

- Pressure ranges from: 0-17 to 0-1000 bar / 0-250 to 0-15000 psi
- Thick film extensimetric measurement principle
- Accuracy: <math>\pm 0.25\% \text{ FS (H)}</math>; <math>\pm 0.5\% \text{ FS (M)}</math>
- SIL2 and PL d approvals for Functional Safety
- ATEX certification for potentially explosive atmospheres
- Flanged version (see drawing for details)
- Protection level: IP66 (6-pin connector)
- 1/2-20UNF, M18x1.5 standard threads; other types available on request
- 17-7 PH corrugated diaphragm with GTP+ coating

## MAIN INTRINSIC SAFETY CHARACTERISTICS

Transmitter designed and produced in compliance with Directive 2014/34/EU ATEX and according to European standards. Protection mode: group II, category 1G, 1D GAS protection mode: Ex ia IIC T6, T5, T4 Ga (Ambient Temp.: -20°C...+60°C / +75°C / +85°C) DUST protection mode: Ex ia IIIC T85°C, T100°C, T135°C Da IP65 (Ambient Temp.: -20°C...+60°C / +75°C / +85°C)

Maximum voltage	30 V
Maximum current	100 mA
Maximum power	0.75 W
Maximum inductance (*)	17 mH
Maximum capacity (*)	10 nF

(\*) includes inductance levels and capacity of a cable: (typical L 1 microH/m and typical C 100pF/m) with maximum length 15m.

The Melt pressure transmitters must be connected to other equipment (galvanic isolation barriers) with individual ATEX certification such as [Ex ia Ga] IIC.

EC-Type Examination Certificate number:  
**DNV 13 ATEX 3894**

## TECHNICAL SPECIFICATIONS

Accuracy (1)	<b>H</b> <math>\leq \pm 0.25\% \text{ FS (100...1000 bar)}</math> <b>M</b> <math>\leq \pm 0.5\% \text{ FS (10...1000 bar)}</math>
Resolution	16 Bit
Measurement range	0..17 to 0..1000bar 0..250 to 0..15000psi
Rangeability	3:1
Maximum overpressure (without degrading performances)	2 x FS 1.5 x FS above 500bar/7500psi
Measurement principle	Extensimetric thick film
Power supply	13...30Vdc
Maximum current absorption	23mA
Output signal Full Scale (FS)	20mA
Zero balance (tolerance $\pm 0.25\% \text{ FS}$ )	4mA
Calibration signal	80% FS
Power supply polarity reverse protection	YES
Compensated temperature range housing	0...+85°C
Operating temperature range housing	-30...+85°C
Storage temperature range housing	-40...+125°C
Thermal drift in compensated range: Zero / Calibration / Sensibility	<math>< 0.02\% \text{ FS}/^\circ\text{C}</math>
Diaphragm maximum temperature	315°C / 600°F
Zero drift due to change in process temperature (zero)	<math>< 0.04 \text{ bar}/^\circ\text{C}</math>
Standard material in contact with process medium	Diaphragm: • 17-7 PH corrugated diaphragm with GTP+ coating Stem: • 17-4 PH
Protection degree (with 6-pole female connector CON300)	IP66
Certificazione SIL2	IEC/EN 62061 - IEC 61508
Certificazione PL d	EN ISO 13849
FS = Full scale output : (1) BFSL method (Best Fit Straight Line): includes combined effects of Non-Linearity, Hysteresis and Repeatability (according to IEC 62828-2)	

# MECHANICAL DIMENSIONS

**NOTE:** dimensions refer to rigid stem length option "4" (153 mm- 6")

**WARNING:** For installation use a maximum tightening torque of 56 Nm (500 in-lb)

## SELF DIAGNOSTICS (ONLY FOR SIL2 / PL d VERSIONS)

Below the conditions detected by the sensor self-diagnostics:

- Cut cable / device non connected / broken power supply, output  $\leq 3.6\text{mA}$
- Pin detachment output  $\leq 3.6\text{mA}$
- Broken primary element  $\geq 21\text{mA}$
- Pressure above 200% of the span, output  $\geq 21\text{mA}$
- Voltage monitor in case of overvoltage/undervoltage/voltage variation in the electronics, output  $\leq 3.6\text{mA}$  (\*)
- Program sequence error, output  $\leq 3.6\text{mA}$  (\*)
- Overtemperature on the electronics, output  $\leq 3.6\text{mA}$  (\*)
- Error on the primary element output or on the first amplification stage, output  $\geq 21\text{mA}$

(\*) In such conditions the Alarm Type can be programmed via HART at  $\geq 21\text{mA}$ .

## NAMUR COMPLIANCE (ONLY FOR SIL2 / PL d VERSIONS)

The sensors are tested according to Namur NE21 recommendations. The same compatibility is valid for the NE43 Namur recommendation with the following sensor behaviour in case of breakdown:

- Cut cable: breakdown information as the signal is  $\leq 3.6\text{mA}$
- Device not connected: breakdown information as the signal is  $\leq 3.6\text{mA}$
- Broken power-supply: breakdown information as the signal is  $\leq 3.6\text{mA}$  or in case of performance problems:
- Broken primary element  $\geq 21\text{mA}$
- Pressure above 200% of the span, output  $\geq 21\text{mA}$
- Others  $\leq 3.6\text{mA}$ (\*)

(\*) In such a condition the Alarm Type can be programmed via HART at  $\geq 21\text{mA}$ .

Note: in all the remaining situations, the output signal is always included between 3.8 and 20.5mA

**Recommendation:** the error level set by the customer (e.g. maximum pressure value) has to be inside the nominal range.

## LOAD DIAGRAM

The diagram shows the optimum ratio between load and power supply for transmitters with 4...20mA output. For correct function, use a combination of load resistance and voltage that falls within the two lines in the graph above.

## AUTOZERO FUNCTION

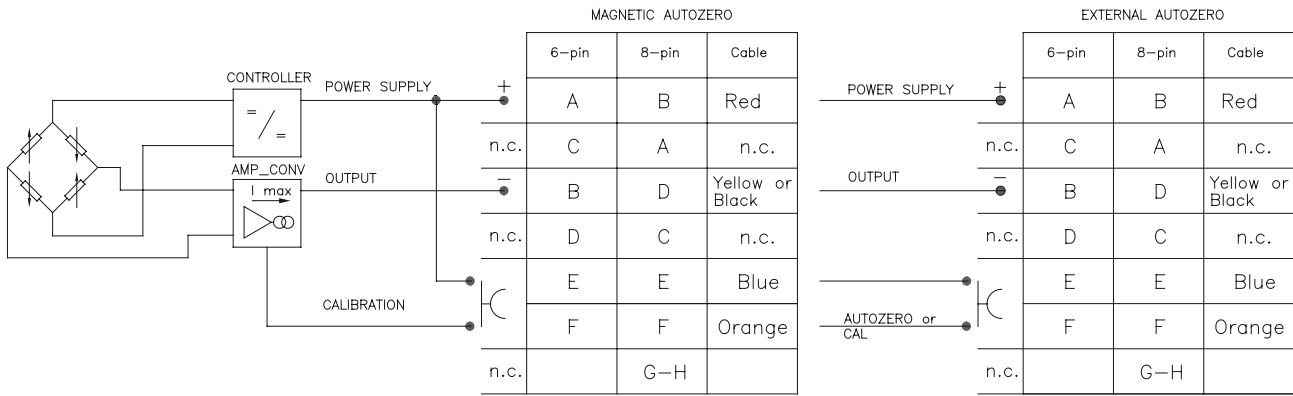

The Autozero function is activated through a magnetic contact (external magnet supplied with the sensor).

The Autozero function can be activated through HART command as well.

See the manual for a complete Autozero function explanation.

# ELECTRICAL CONNECTIONS

## CURRENT OUTPUT

The cable shield is tied to both sides, i.e. to the sensor connector and to the controller

**6 pin Connector  
VPT07RA10-6PT2 (PT02A-10-6P)**

**8 pin Connector  
(PC02E-12-8P) Bendix**

**Cable outlet (1/2 14-NPT)  
Current output  
L = 1**

## ACCESSORIES

### Connectors

6-pin female connector (IP66 protection degree)  
8-pin female connector

**CON300**  
**CON307**

### Accessories

Mounting bracket  
Copper washer silver plated  
Fixing pen clip  
Autozero pen

**SF18**  
**RON007**  
**PKIT 1032**  
**PKIT 378**

### Extension cables

6-pin connector with 3mt Atex cable  
6-pin connector with 4mt Atex cable  
6-pin connector with 5mt Atex cable  
6-pin connector with 10mt Atex cable

**PCAV221**  
**PCAV104**  
**PCAV105**  
**PCAV106**

### Cable color code

Conn.	Wire
A-2	Red
B-4	Black
C-1	White
D-6	Green
E-7	Blue
F-3	Orange
5	Grey
8	Pink
